pertaining to the AIDS prevention Bill, 1989. The first major issue is the policy to be adopted with regard to regulating prostitution. The second issue is how to ensure confidentiality. There is also the question of whether any penalty should be incorporated. Providing for penality may be counter productive if patients preferring anonymity refuse to seek medical attention.

In the light of the foregoing, a legislation is not considered necessary for preventing and controlling HIV Infection. What is required to be done, is to promote activities in the areas of informtaion, education and communications, directed at the general popoulation and groups practising high risk behaviour, promoting blood safety by establishing zonal blood banks and promoting voluntary blood donation, conducting surveillance of high risk groups with a view to assessing prevalence rates and trends in various regions, organising medicare facilities for HIV nfected/AIDS patients in identified Hospitals etc. The Government is already attending to these tasks under the National AIDS Control Programme.

(c) No.

(d) Does not arise.
